PROFESSIONAL SUMMARY

A Mechanical Design Engineer with over 1Yr and 4 months of experience in CAD modelling, product design and development. Skilled in using ZEISS Reverse Engineering Scanner & ZEISS Reverse Engineering Software, GOM Inspection Tool Software, AutoCAD, PTC Creo, Solidworks as well as with the basic knowledge of Testing facility like Non-Destructive Testing, Impact Testing, Proof Load Testing and study of some oil well drilling equipment standards. A strong understanding of engineering mechanics, strength of material and machine design. Good leadership skills that optimize collaboration between departments to produce high-quality industrial machines and equipment. Seeking Job opportunities in a highly innovative and fast paced environment.

WORK EXPERIENCE

Designation - Design Engineer

Autobahn Industries

11/2020 – Present,

Jodhpur, Raj.

Autobahn Industries is a good manufacturer and supplier of oil well drilling rig tools and equipment with 50 yrs. of experience in the field.

Responsibilities

- Working on the ZEISS COMET 3D SCANNER (BLUELIGHT).
- Working on the ZEISS Reverse Engineering Software, GOM Inspection tool software.
- Working on the CAD software like PTC Creo, Solidworks and AutoCAD for the modelling and making of drawings with bill of material (BOM).
- Working on the new designs and developments for the organization like Power Tong, Shale Shaker, etc.
- Working on the assemblies & sub-assemblies of large components.
- Using ANSYS Software for Simulation in Static Structural Analyses of components and assemblies.
- Completed the project "Pneumatic Tubing Spider" used to hold the drill pipe while drilling.
- Designed a new type of Rotary Slip which can bear 50% more load compare to the old one for the offshore and more deep-down drilling.
- Participated in three Audit performed by American Petroleum Institute (API).

Contact: Rameshwar Deg (Director Technical of Autobahn Industries)

+91-7877234078

EDUCATIONAL QUALIFICATION

B.E. in Mechanical Engineering

M.B.M Engineering College

2016-2020,	Jai Narain Vyas University	6.63 CGPA
Class XII		
2014-2015,	R.B.S.E	83%
Class X		
2012-2013,	R.B.S.E	80%

SKILLS AND EXPERIENCES

- Certified user of ZEISS COMET 3D SCANNER and ZEISS REVERSE ENGINEERING Software.
- Experience in using the GOM Inspection tool software for inspection by doing the surface comparison of actual data to CAD data.
- Experience in CAD modelling using software like PTC Creo and Solidworks.
- Experience in making 2D-drawings in AutoCAD software with bill of material (BOM).
- Experience in using ANSYS software for static structural simulation.
- Basic knowledge of NDT tests like Magnetic Particle Test and Ultrasonic Test as well as destructive test like Impact Test for metallic parts.
- Studied some of the standards relevant to Oil and Well Drilling & Servicing Equipment like API-7K, API-Q1, ASME-BPVC, ISO-9000:2015.
- Good command on other software like Microsoft Word and Excel.
- Great experience of teaching Mathematics to 11th and 12th standard students (for IIT Exam) for around 3 yrs.
- Good communication and leadership skills, creative, oriented and punctual.

ACADEMIC PROJECT

- **Project Title** – CFD Analysis of Concentric Tube Heat Exchanger Using ANSYS.
- **Year** – VIIIth Semester (Final Year Project)
- **Submitted to** – Mr. S.K. Singh (H.O.D of Mechanical Department, M.B.M Eng. College)
- **Description** - In this project, CFD analysis of concentric tube heat exchanger is done using ANSYS software in FLUENT Analyses. The purpose is to set up a model having a pipe flowing hot fluid in it covered with a tube flowing cold fluid in it and the setup is called concentric tube heat exchanger through which we heat transfers from hot fluid to cold fluid and through ANSYS we find out the temperature profile across the pipe so basically it is a case study of cooling hot oil is performed using water as a cold fluid in ANSYS.

INDUSTRIAL TRAINING

Northern Western Railway Carriage Training (12th June, 2018 to 26th July, 2018)

- Done my summer internship training at "North Western Railway Carriage Workshop, Jodhpur" for the period of 45 days where I learned various processes performed in different shops like Machine Shop, Fabrication Shop, Fitting Shop, Wheel Shop, Roller Bearing Shop, Mill Wright Shop, Lifting Shop, Trimming Shop, etc.

Diesel Locomotive Shed Training (15th June, 2019 to 31st July, 2019)

- Done my summer internship training at "Diesel Locomotive Shed, Jodhpur" for the period of 45 days where I learned about the classification of locomotives, fuel injector pumps and its constructions, turbocharger with its history, operating principle and its working, brakes and its types, compressor, traction motor and the failure analysis.

WORKSHOPS AND SEMINARS

- Participated in the "Embedded System and Robotics Club workshop (ESRC)" from 12th June to 11th July, 2017 conducted by Dr. Alok Singh Gehlot where I learned to work on open-source electronic prototyping platform called Arduino and with the help of it made line follower robot, balancing bot and quadcopter.
- Participated in the competition called "Skills of Debating" conducted by the M.B.M Engineering college.
- Attended the seminar on "Women Empowerment" and "Entrepreneurship and Development" conducted by the M.B.M Engineering college.

LANGUAGE PROFICIENCY

- English & Hindi.

HOBBIES AND INTERESTS

- Reading Books, Bike Riding, Exploring new places, Cooking, Swimming.
