Profile Summary

Results-driven Mechanical Engineer with over 8+ years of experience in CAD and CAM. Expertise in 3D scanning, Reverse engineering, pattern designing and precise CAD modeling for assembly parts, showcasing meticulous attention to detail and compliance with engineering standards. Proficient in streamlining production processes, managing CNC, VMC, and grinding machining, and driving continuous improvement initiatives. A collaborative leader and effective communicator, actively contributing insights in technical assessments.

Skills

Technical Skills: CAD (CATIA V5, Siemens NX, Solid Edge) | CAM (NX CAM & MASTER CAM) | 3D Scanning | Reverse Engineering (GEOMAGIC DESIGN X) | INSPECTION (CONTROLX) | GD&T | Unit Economics | Bill of Materials (BoM) Management | Inventory Management | CNC | VMC | Grinding Machining

Soft Skills: Collaboration | Communication | Leadership | Problem-solving | Attention to Detail | Adaptability | Critical Thinking | Project Management | Customer Focus | **Deutsch German language (A2 Max Muller ,Pune)**

Work Experiences

Design and Application Engineer | Guardwell Industries Pvt Ltd, Mumbai Vasai East | Sep'24-Present

- Review the product specifications and requirements as per BIS standards
- Applied BIS standards for design, focusing on strength, durability, and safety of the SAFE.
- Created detailed **BoM** for material handling locks, considering component specifications, materials, and costs.
- Report on cost trends and variance cost-saving measures
- Ensure that costing procedures comply with financial and regulatory standards. Work and Collaborating with Other team
- Ensure that costing procedures financial and regulatory standards. Work with internal audit or review costing processes and ensure controls are in place.

Reverse Engineer and CAM | Subhadra Metals Pvt Ltd, Mumbai Khalapur | Aug 22-Sep 24

- Conduct **3D scanning** create CAD Models, ensuring precise patterns for assembly parts valves such as Butterfly, Globe, Gate, Pressure Reduce and Relief valves and Marine products propeller and radar stocks.
- Coordinate technical data documentation in UG, Solid Edge, and Geomagic, engineering standards and gaining approval from GRSE.
- Development of service valves and propeller remanufacturing specs, collaborating with internal and external engineering teams for meticulous drawings and reviews.
- Engaged as a presenter and reviewer in technical assessments of valuable insights
- Ensure less uploading of drawings and specifications in standards system for client review processes

Production Engineer | Midas Metal, Kolhapur | Aug'18-Aug 22

- Streamlined production processes by customizing machining procedures, cross-functional teams for optimized finished goods delivery.
- Maintained consistent first time quality and tool breaking analysis by reviewing on simulation on 3D
- Expertly managed CNC, VMC, and conventional grinding machining, maintaining operational excellence and high-quality output standards.
- Established and nurtured third-party vendor relationships, aligning their processes with established standards for seamless integration.
- Initiated continuous improvement by proactively identifying and resolving recurring machining process issues

Quality Engineer | SamFlow Tech | Nov'16-Aug'18

- Oversaw and maintained stringent dimensional parameters, ensuring adherence to tolerance levels during the first piece inspection, elevating overall product quality.
- Pioneered innovative approaches like poka-yoke to resolve dimensional and visual parameter challenges
- Regularly raised and contributed to issue resolution on the GEMBA platform, perpetuating a culture of continuous improvement.

Education

B.E in Mechanical Engineering (64.65% Aggregate all sem.) | Dr. J. J. M. CoE Jaysingpur, Shivaji University Kolhapur 2014
