

Yashog Nirnanjan

Product Designer

Design is about user inputs. Design for me is making complex ideas more accessible for user by working around constraints and finding creative ways to satisfy user.

PERSONAL PROJECTS

"Design of an urban planter for a smart living"

- As we all known cities are rapidly growing, there is increase in urban population which leads to enormous demand on urban food supply. Accessing organic food without the risk of adulteration has been challenging for many families living in urban area. Urban agriculture or kitchen gardening is something that gives these city dwelling chance to produce fresher and healthier food.

"Design of interactive kitchen assistant"

- Kitchen is the most important part of the house. There can be no house without kitchen. Food is one of the key component for us to live but most of the youth hesitate to go to kitchen to prepare food added to this Managing kitchen is tedious tasks for both younger & older generation which forces the need of assistance in the kitchen. Being in the world of IOT, a Smart kitchen assistant with a visual interface would give a better experience in the kitchen.

"Design and development of kids Utensils"

- At a very young age motor skills are developed. The right way of motor sense is registered when children practice. So, parents prefer their children to eat on their own. Utensils used by adults aren't similar to kids utensils. There is a need for designing children friendly Utensils. Utensils in the market doesn't consist of all the utensils in one kit. I.e. no complete utensil kit is available

Design and Development of STEM Toy Kit for Children

- Stem toys improves thinking ability in kids, i.e., kids will learn to think independently. Cognitive thinking skills are required to perform learn, read, understand, remembering, focusing. It also improves problem solving ability in kids. It improves fine motor skills in children. It makes kid to do basic mathematical operations easily and quickly. It also improves memory skills of kid. It also improves language and social behavior in kid.
